## **Mom's Best Naturals Cereals**

Perusing the cereal aisle at the grocery can be overwhelming and expensive. Narrow your search today to include the Mom's Best Naturals line of kid-, budget- and earth-friendly varieties. The company is based in Minnesota and has been family owned for four generations. Both all-natural and wholesome, the production of these cereals is powered by wind energy. You'll soon find yourself obsessed with the Mallow-Oats (as in marshmallows, of course) or Toasted Cinnamon Squares. Each serving has 10 grams of whole grain and you won't find any high fructose corn syrup (HFCS) anywhere. A bonus? These cereals cost 20-50% less than popular national brands and other natural and organic brands. Cheaper, better tasting, good for you and ecologically mindful—sounds like a recipe for success!
